

SEL Technical Seminar—Distribution Network Automation

IEEE Rural Electric Power Conference

Friday, April 17, 2020 • 8:00 a.m. to 2:00 p.m. • San Antonio, TX

Learn about solutions you can implement today to improve your distribution system by joining us at our complimentary technical seminar following the IEEE Rural Electric Power Conference.

Today, utilities face many challenges and regulations for distribution. Join us to learn about SEL solutions for enhancing protection, speeding up restoration, extending secure communications, mitigating wildfire risk, deploying automation, and improving power quality. SEL products that we will discuss include recloser controls, fault indicators, cellular routers, automation controllers and software, capacitor bank controllers, and voltage regulators.

We'll also highlight new releases, including the SEL-734W Capacitor Bank Controller, our newest automation platform, and software applications.

Seminar Agenda

7:30 to 8:00 a.m.	Breakfast (included)
8:00 to 8:15 a.m.	Welcome and Company Introduction
8:15 to 9:15 a.m.	Overview and Programming of the SEL-651R Advanced Recloser Control
9:15 to 9:45 a.m.	Apply Wireless Sensors to Improve Distribution Reliability
9:45 to 10:00 a.m.	Break
10:00 to 10:45 a.m.	Feeder Voltage Regulation and Power Factor Control
10:45 to 11:15 a.m.	Feeder Protection Enhancements with the SEL-FT50 and SEL-FR12 Fault Transmitter and Receiver System
11:15 a.m. to 12:15 p.m.	Lunch (Provided)
12:15 to 1:00 p.m.	Engineering for Substation Data Intelligence
1:00 to 2:00 p.m.	Wildfire Mitigation—Applying SEL Technology as Part of a System-Level Solution
2:00 p.m.	Closing Remarks

Following the seminar, all attendees will receive an electronic certificate for 5 Professional Development Hours (PDHs) for their attendance. For more information, please contact Jett Jones at jett_jones@selinc.com.
